

## FWCD MISSION STATEMENT AND GOALS

The FWCD will strive to improve and maintain district property and operations at an optimal level. Below are the following goals of the district moving forward that will maximize operations and beautify The Falling Waters Conservancy District:

- A. Provide upgrades to the existing lift stations. (Complete)
- B. Remove and replace existing fencing at the scenic vistas and secure treatment plant roof with fencing. (Complete)
- C. Continue to maintain and improve the quality of the appearance of district property.
- D. Continue to maintain and look for improvements for the Treatment Plant.
- E. Maintain the lakes and communicate with fish and wildlife for providing improvements for better quality of marine life in our lakes.
- F. Camera District infrastructure. (Complete. Infrastructure in good condition)
- G. Future installation of a third fountain on Wishbone Lake. (Complete)
- H. Upgrade existing fountains with light features (ongoing). (Complete)
- I. Dredge and upgrade pond at Druim Trail. It is our goal to beautify the pond, and stock it with Pan Fish and Bass.
- J. Work with and partner with the FWHOA to make improvements to common area property, for example: install walking paths around the lakes, build a park, build a pavilion, create public gardens, social activities and etc.
- K. Future installation of sitting areas, walking trails at FWCD outlots and provide access from the vistas to the lakes and meadows. This will be completed throughout the subdivision where the vistas currently exist.
- L. Maintain the retaining walls throughout the conservancy District.
- M. Evaluate and continue ongoing maintenance and cleaning of the force main. Future upgrades if needed.
- N. Evaluate and maintain district infrastructure and sanitary sewer lines.
- O. Maintain and regularly test the new backup generator.
